

Our courses are all delivered by experienced professionals who have all used the contract on site either recently or currently. The advice is therefore sharply focussed on the practical. It is a 'How To' approach that Engineers, Surveyors, and Commercial staff will find very useful.

Over 2000 construction and engineering professionals have attended a Driver course in the last year. Between 96% and 100% of delegates across those events rated the presentation and speaker as either Good or Excellent. Some of the delegates said:

"...the best investment of 2 hours I have made this year."

"This is one of the few courses that I like to attend and actually learn something...thank you again."

"An excellent seminar – very well structured and presented in an interesting way."

DRIVER OFFER NEC3 CONTRACT ADVICE AND SUPPORT INCLUDING THE FOLLOWING:

- **NEC3 – Pre-Contract** On receipt of your booking request we will liaise with our team of trainers to check availability in your area. If, for whatever reason, we are unable to provide training on the day requested we will advise you of a number alternatives.
- **NEC3 – Start Up Workshops**
- **NEC3 – An introduction**
- **NEC3 – Intermediate**
- **NEC3 – 5 Key Commercial Issues**
- **NEC3 – In Practice**
- **NEC3 – Programming Workshop** For current prices, please contact your local office, or email NEC3@driver-group.com
- **NEC3 – Health Check**

NEC3 – Pre-Contract

Considers the bidding process, completing contract data and risk register and the tender contract programme. A project specific workshop delivered in house. **4hrs**

NEC3 – Start Up Workshops

A project specific workshop, our expert sits down with the site team and runs through the application of the key terms of the project and gives administration advice to protect interests and identify opportunities from the very start. **4hrs**

NEC3 – An introduction

For staff new to the contract, this user friendly session gives an overview and practical advice with pointers as to templates that will be useful for contract administration. **1 Day**

NEC3 – Intermediate

For those who have experience of the basics, but want a more detailed review of their project and the use of the core clauses. Includes planning detail and dealing with CE's in detail. **4hrs or 1 day**

NEC3 – 5 Key Commercial Issues

A seminar designed to look at five of the most common problems that might arise in terms of NEC contract administration and their solutions. A practical and applied approach. **3hrs**

NEC3 – In Practice

A look at various scenarios on a 'typical' project and a review of the different ways to deal with those situations. A practical session for NEC users. **3hrs**

NEC3 – Programming Workshop

One of our experienced planners will lead this session and explain how to set up an NEC3 compliant programme, the use of float and time risk allowance and how to update the programme with compensation events and early warnings. Advice is given about how to get a programme accepted. **4hrs**

NEC3 – Health Check

A bespoke visit to your project for a complete review of the contract, Contract data and Z clauses. The review will cover procedures and Early Warning, along with a review of compensation events to date. A copy of contract data is required in advance, along with any Z provisions. The review takes a full day, and a detailed report is provided within 5 working days that highlights areas on non compliance, risks and opportunities along with practical advice to improve the commercial position. **TBA**
