- Optimised Project Schedule and Budget
- Project Tracking
- Construction Documentation
- Construction Methodology
- Logistics Planning and Visualisation
- Delay Analysis
- Engineered Visualisation of Combined Models
- Generation of Reports

COMMISSIONING STAGE

- Facility Management
- Operations Management
- Claims and Resolution Support
- Scan to BIM
- Augmented Reality and Virtual Reality

ABOUT US

Global Data & Development Team

Our expert team is the technological arm of Driver Group. We specialise in the development and integration of new technologies to the current workflow, within the organisation.

The team can assist at early project, concept design, contract, bid tender, schedule validation, schedule analysis, operations, maintenance and facility management stages.

As the construction industry moves into a digital era, the team's focus is on utilising the latest technology to produce visualisations for dispute resolution and project services.
